About this Training

This intensive 5-day course is designed for experienced project professionals seeking to earn the globally recognized PMI® Project Management Professional (PMP®) certification. Based on the latest PMI® Exam Content Outline, the training focuses on the three exam domains – People, Process and Business Environment – and integrates predictive, Agile and hybrid delivery approaches. Through practical examples, exam-focused exercises and mock examinations, participants develop the knowledge and confidence needed to successfully pass the PMP® certification exam while strengthening their project leadership capabilities.

Learning Objectives

By the end of this training, you will be able to:

- Understand the PMI® project management framework and the PMP® Exam Content Outline.
- Lead project teams using effective leadership, communication and stakeholder engagement techniques.
- Apply predictive, Agile and hybrid project management approaches according to project needs.
- Manage project scope, schedule, cost, quality, resources, procurement, risk and stakeholder expectations.
- Integrate business value, governance and strategic alignment into project delivery.
- Apply professional and ethical decision-making throughout the project lifecycle.
- Prepare confidently for the official PMI® PMP® certification exam through realistic practice questions and mock exams.

Program

Day 1	PMP® certification overview, project management fundamentals, predictive, Agile and hybrid approaches, project governance, organizational structures, project initiation and stakeholder engagement.
Day 2	Project planning, scope, schedule, cost, quality, resource management, communications, procurement, and project performance measurement.
Day 3	Leadership, team performance, conflict resolution, emotional intelligence, risk management, stakeholder engagement and delivering business value across project environments.
Day 4	Agile frameworks including Scrum and Kanban, hybrid delivery models, adaptive planning, product delivery, change management, governance and exam-focused scenarios.
Day 5	Comprehensive review of the People, Process and Business Environment domains, full-length mock exam, question analysis, exam strategies and final certification preparation.

Prerequisites

Participants should have prior project management experience and meet the PMI® eligibility requirements for the PMP® certification exam. This course is intended for project managers, project leaders, program managers and experienced professionals who are preparing for the PMP® certification. While attendance does not guarantee exam eligibility, the course satisfies the required 35 hours of formal project management education needed to apply for the PMP® exam.

Exam Information

- The official PMI® PMP® exam consists of 180 questions covering predictive, Agile and hybrid project management approaches.
- Exam duration: 230 minutes.
- The exam is computer-based and administered through PMI-authorized testing centers or online proctoring.
- The exam voucher is not included with the course.
