Voucher included – public price for virtual training.

About this Training

The Leading SAFe® course introduces the foundations of the Scaled Agile Framework and equips participants with the principles and practices needed to confidently drive a Lean-Agile transformation across teams and the wider organization. The course is built around SAFe's core principles, roles, and templates, and prepares candidates for the official SAFe® 6 Agilist (SA) certification exam.

Learning Objectives

- Adopt the mindset of a Lean-thinking, servant leader.
- Apply the values and principles of a Lean-Agile mindset.
- Apply SAFe's Lean and Agile principles to the roles and practices of the framework.
- Build high-performing teams and Agile Release Trains around a shared mission.
- Lead a transformation using the SAFe Implementation Roadmap.
- Support PI Planning and the key events of Program execution.
- Drive Release on Demand through the Continuous Delivery Pipeline.
- Align strategy and execution through Strategic Themes and Lean Portfolio Management.
- Prepare for and pass the official SAFe® 6 Agilist (SA) exam.

Program

Day 1	Introduction to the Lean-Agile mindset and SAFe principles, applying SAFe roles and practices, building high-performing Agile teams and Trains, and establishing team mission and purpose
Day 2	PI Planning and Program execution, the Continuous Delivery Pipeline and Release on Demand, Lean Portfolio Management and Strategic Themes, exam preparation, sample questions and mock exam

Prerequisites

There are no formal prerequisites to attend the training.

Exam Information

- The official SAFe® 6 Agilist (SA) exam consists of 45 objective test questions.
- A score of 80% is required to pass.
- Duration: 90 minutes.
